SUMMARY

Data scientist with experience in analysis, data wrangling and visualization using R, Python, and SQL. Works collaboratively across varied roles to provide flexible support and contextualized insights.

SKILLS

- R (R Markdown, Tidyverse, sf), Python (Pandas, Matplotlib, Seaborn, Quarto, scikit-learn, PyTorch), SQL (PostgreSQL), Google Sheets
 - Data visualization, analysis, and wrangling; presentation, public speaking, written and verbal communication; leadership and project management
-

EDUCATION

Master of Science in Data Science, Willamette University | Salem, OR

August 2026

Bachelor of Science in Data Science, Willamette University | Salem, OR

May 2026

PROJECTS

Oregon on Fire, Capstone

May 2026 – August 2026

- Created a standardized spatial dataset for multi-feature analysis by integrating shapefiles and tabular data, including cleaning, feature engineering, and handling spatial data from diverse sources in multiple formats
- Analyzed trends in wildfire severity in reference to keystone species presence, prescribed burns, and federally recognized Indigenous land, providing a landscape-level view of wildfire trends

Prague Metro System Data Pipeline, Adv. Data Engineering

May 2026 – August 2026

- Incorporated diverse data sources (SQL, document, and graph databases) into a pipeline orchestrated by Airflow with models built by dbt, resulting in Grafana dashboards answering of business questions with visuals, text analysis and summary
- Facilitated project handoff by writing comprehensive and clear documentation, including diagrams and a video walkthrough

NCAA Equity in Athletics, Data Visualization

January 2026–May 2026

- Illustrated gender inequities in NCAA athletics through a series of interactive graphics, leveraging the ggplot and plotly libraries in R
 - Presented findings in verbal and written formats to increase awareness of gender disparities and dispel myths about women's collegiate sports
-

WORK EXPERIENCE

Rainbow Youth Community Needs Survey Consultant | Salem, OR

March 2026–August 2026

- Created a report for shareholders and investors to promote the funding of a new LGBTQ+ community center after cleaning, reshaping, and analyzing survey data
- Enabled future data work by proposing changes to the existing survey and writing comprehensive documentation of cleaning and analysis processes

Instructor, CodeREV Kids | Santa Rosa, CA

June 2025–August 2025

- Increased ~60 students knowledge of and confidence with coding and circuitry basics using Pencilcode, Scratch coding, and Snap Circuits over two multi-week sessions with instruction and live demonstrations
- Ensured all students (regardless of coding experience) were able to comfortably participate by fostering a collaborative and creative classroom space
