SUMMARY

Data science masters student with experience in analysis, data wrangling and visualization using R, Python, and SQL. Works collaboratively across varied roles to provide flexible support and contextualized insights.

AREAS OF EXPERTISE

- R (R Markdown, Tidyverse, sf), Python (Pandas, Matplotlib, Seaborn, Quarto, scikit-learn, PyTorch), SQL (PostgreSQL), Google Sheets
 - Data visualization, analysis, and wrangling; presentation, public speaking, written and verbal communication; leadership and project management
-

EDUCATION

Analyzing Wildfire Outcomes Across Oregon, Capstone

May 2026 – August 2026

- Created a compact dataset for quick analysis and modeling of complex questions by integrating multiple shapefiles and tabular data, including cleaning and feature engineering, handling spatial data from diverse sources in multiple formats
- Will analyze trends in wildfire severity in reference to keystone species presence, prescribed burns, and federally recognized Indigenous land

Prague Metro System Data Pipeline, Adv. Data Engineering

May 2026 – August 2026

- Incorporated diverse data sources (SQL, document, and graph databases) into a pipeline orchestrated by Airflow with models built by dbt, resulting in Grafana dashboards answering a series of business questions with visuals and text analysis and summary
- Facilitated project handoff by writing comprehensive and clear documentation, including diagrams and a video walkthrough

NCAA Equity in Athletics, Data Visualization

January 2026–May 2026

- Illustrated gender inequities in NCAA athletics through a series of interactive graphics, leveraging the ggplot and plotly libraries in R
 - Presented findings alongside my partner in verbal and written formats to increase awareness of these disparities and dispel myths about women's collegiate sports
-

WORK EXPERIENCE

Rainbow Youth LGBTQ+ Community Center Survey I Salem, OR

March 2026–Present

- Created a report for shareholders and investors to promote the funding of a new LGBTQ+ community center after cleaning, reshaping, and analyzing survey data
- Enabled future data work by proposing changes to the existing survey and writing comprehensive documentation of cleaning and analysis processes

Instructor, CodeREV Kids I Santa Rosa, CA

June 2025–August 2025

- Increased ~60 students knowledge of and confidence with coding and circuitry basics using Pencilcode, Scratch coding, and Snap Circuits over two multi-week sessions with instruction and live demonstrations
- Ensured all students (regardless of coding experience) were able to comfortably participate by fostering a collaborative and creative classroom space
